

## Civil Engineering & Infrastructure

Cordell's Civil Engineering and Utilities data is the most comprehensive range of data for civil engineering projects including road, bridges, tunnels, masterplan communities, pipelines, dams, docks, retaining walls, civil works, loading docks, demolition, dredging and earthworks, railways and container terminals. Treatment plants, water distribution and drainage systems, pumping stations and reservoirs are also covered.

Data is available covering all construction within a set geographic area, or you can tailor your solution to niche subsets which can be delivered nationally, or within smaller defined territories.
