

## PRODUCT MANAGER - HUB

The CoreLogic Product team is committed to delivering truly innovative solutions that drive transparency, insights and confidence in property decisions. At more than four times the value of the ASX, property is Australia's largest asset class and makes a compelling subject matter with great relevance to Australian's and Australian businesses.

Product Management at CoreLogic is a great opportunity for passionate product practitioners to flex their skill in an area with real relevance. The Product team spans multiple disciplines including analytics, data, web, mobile, ecommerce and platforms across the dynamic and fast paced Consumer, Real Estate, Finance and Insurance segments. The Product Management teams leverage the latest in Product thinking and run development in an Agile Scrum environment. For the right Product Manager the roles will stretch you to think bigger and execute in a fast paced, innovative environment.

### **Key Responsibilities:**

Tasks pertinent to this role include:

- Manage the build and launch of new products and features, ensuring that they are "market ready" at time of launch, including having complete documentation, product collateral and ongoing operational and support processes in place
- Develop and implement Go To Market plans for each product working with and providing training to the Sales, Solutions, Marketing, Legal and Customer Care teams
- Develop and maintain a product roadmap for each product and communicate to relevant stakeholders
- Secure market intelligence on competitors, customers and general industry trends to drive product roadmap priorities
- Prepare and deliver regular reporting on product performance, usage, adoption, win/loss analysis and market share analysis
- Manage product revenues and pipeline to maximise profitability of products
- Oversee & guide delivery teams where required & articulate product requirements
- Work with Infrastructure, Training and Customer Care teams to ensure efficient product adoption, support services and incident management
- Work with the Project Management Office and IT Development to ensure efficient, effective, reliable and scalable product development that aligns with the overall Product Architecture
- Maintain each product throughout its development-to-retain life cycle

### **Key Competencies Required:**

To be successful in this role the key competencies required include:

- Demonstrated analytical skills with knowledge of the development process relating to both new products and the maintenance of existing products, including Go To Market competencies
- Ability to analyse and interpret market trends and feedback
- Excellent time management skills, well organised and able to forward plan
- Ability to work in a dynamic environment with constantly changing priorities
- Strong decision making skills and demonstrated problem solving skills
- Project management skills including ideally Agile experience and an understanding of the "product owner" role in scrum teams
- Ability and willingness to understand detailed data concepts, and their impacts on products and customers

### **Experience and Education Required:**

- At least 3 years similar coupled with tertiary qualifications in Business, IT or similar
- Experience in the Real Estate, Banking/Finance or Valuer industry (highly regarded)
- Experience in product management (highly regarded)
- Experience in retail credit risk management experience (highly regarded)
- Experience in data models, data analysis (highly regarded)
